You can get manual from below URL

http://w3.tw.ute.com/pub/cs/software/scanservice/document/ScanService_UM.pdf

Software

Is it possible to change device name or Host Name?

Here is the new APK file download link of the "OEMConfig" App for PA726:

http://w3.tw.ute.com/pub/rd/PA726/APP/OEMConfig/OEMConfig-PA726_20200409.zip

This App can read the "OEM_Config.json" configuration file in the "Internal Storage", then setup the device name and hostname based on the content of the configuration file.

For example, if user want to set the hostname into "PA726-Unitech", they can put following content in the "OEM_Config.json" configuration file:

```
"HOST_NAME":"PA726-Unitech"
```

Another example is if user want to set the device name into

"PA726-Unitech", they can put following content in the "OEM_Config.json" configuration file:

```
"DEVICE_NAME":"PA726-Unitech"
```

For complete JSON file example, please download the sample "OEM_Config.json" files with following link:

<http://w3.tw.ute.com/pub/rd/PA726/APP/OEMConfig/Example Config File 20200409.zip>
