Checking LED Status

Battery Charging Status LED

Power LED

Charging the Battery

Plug the AC adapter cable into the power jack on the battery charger, and then plug the other end of the AC adapter into an electrical outlet.

Put the battery into the charger, and the charger will automatically detect the presence of batteries and begin charging.

LED Status	LED Type	Description
Solid Red Light	Power LED	Power supply is connected.
	Battery Charging Status LED	Battery is being charged.
LED Off	Power LED	Power supply is not connected.
	Battery Charging Status LED	Battery charging is completed.
Flashing Red Light	Battery Charging Status LED	Power supply is connected without battery.

CAUTION!

- To ensure the unit working properly, please keep all connectors away from the contaminants staying inside of them such as dust, grease, mud, and water. The negligence may cause the unit with no communication, short circuited, overheated and so on.
- If the connector is damaged, please ensure the connector is being fully repaired before using the unit to avoid causing short circuited.

Note: The port on the right and left side is for the cradle hook.

Cradle Hook

By adding cradle hooks on the sides of the cradle, you can secure the cradle with screws.
