

MS926P

FW

Does MS926P support prefix & suffix?

Yes, scan "//.PR" to set the preamble and "//.PO" to set the postamble.

What is the side effect, if we want to disable power saving all the time.

Strongly recommend not to disable the power saving setting.

The device might experience the screen burn-in (an after-image effect) on the OLED screen if the screen is on for the long hours.

Software

MS926P can't output chinese in Win10.

Please refer to link below for SetUnicodeInputRegistry.zip utility
