System Setting

Standby - low fill light

When the scanner is in standby mode and exceeds the set standby time, set the fill light to low brightness.

The default standby time is 10000 ms, the maximum settable time is 3600000 MS, the minimum is 1000 ms, and the setting time is 0 to turn off the low fill light function.

The fill light is set to low brightness after standby for 3000 ms.

Scan "Enter Setting"

Standby - Low Fill Light

Enter Setting

Exit and Save

Sleep - Light Up Off

Turn off the fill light when the scanner is in standby mode and exceeds the set sleep time.

When sleep is turned off by default, the maximum setting time is 3600000 ms and the minimum setting time is 1000ms. If the setting time is zero, the sleep function is turned off.

The fill light is set to low brightness after 60000ms standby

Same Barcode Setting

When reading the same barcode within the set time, reading the barcode will ignore not output and re time the limit time to avoid repeated reading of the same barcode.

Within 300 ms, the same barcode will not be read again by default, and 0-5000ms can be set. 0 means no interval.

Do not output the same barcode read repeatedly within 100ms.

Decoding length set

•Limit single length

Setting example:

Restrict reading of single length barcodes, for example, set the read length to 14 characters code 128

1. Scan “Enter Setting”
2. Scan **code 128**, limit single length setting code
3. Scan **ASCII Code table**, number 1 barcode
4. Scan **ASCII Code table**, number 4 barcode
5. Scan “Exit and Save”

•Limit 2 different lengths

Setting example:

Restrict reading 2 barcodes with different lengths, for example, set the read length to 2 characters and 14 characters of code 128

1. Scan **Enter Setting**

2. Scan code 128 to limit 2 different length setting codes
3. Scan **ASCII Code table**, number 0 barcode
4. Scan **ASCII Code table**, number 2 barcode
5. Scan **ASCII Code table**, number 1 barcode
6. Scan **ASCII Code table**, number 4 barcode
7. Scan Exit and Save

•Limit length range

Setting example:

Restrict reading of barcodes within the length range, for example, set the read length to

8 - 14 character code 128

1. Scan **Enter Setting**
2. Scan code 128 , limited length range set code
3. Scan **ASCII Code table**, number 0 barcode
4. Scan **ASCII Code table**, number 8 barcode
5. Scan **ASCII Code table**, number 1 barcode
6. Scan **ASCII Code table**, number 4 barcode
7. Scan Exit and Save

•Any length

Setting example:

1. Scan **Enter Setting**
2. Scan code 128 , any length setting code
3. Scan Exit and Save

Output format

The following is the data output format

Barcode type (4 bytes)	Prefix (4 bytes)	AIM ID	Barcode content	Suffix (4 bytes)	Terminal character (1 byte)
---------------------------	---------------------	--------	-----------------	---------------------	--------------------------------

Barcode type

- 1、The default output is not to output barcode type
- 2、Open and close the output of barcode type through serial Interface commands and scan barcode
- 3、Only supInterface serial mode, USB keyboard does not supInterface

The format is defined as follows :

Start sign 0x03 (1 byte)	Barcode system code (1 byte) Hex	Barcode length (2 bytes) 0x0001 ~0xFFFF
-----------------------------	----------------------------------	--

Barcode system code is as follows :

Code	2D barcode	Code	1D barcode	Code	1D barcode
0x 41	PDF417	0x61	UPC A	0x71	Pharmacode
0x 42	Micro PDF417	0x 62	UPC E	0x72	GS1 DataBar 14
0x 43	Data Matrix	0x 63	EAN 8	0x73	GS1 DataBar Expanded
0x 44	QR	0x 64	EAN 13	0x74	GS1 DataBar Limited

Prefix

Add output characters before barcode data, up to 4 characters can be set

Add a character before all barcode data:

1. Scan " Enter Setting"
2. Scan "Set All Code Prefix"
3. Scan ASCII Code table,a set code
4. Scan "Exit and Save"

Remove prefix:

1. Scan " Enter Setting"
2. Scan "Turn off all code prefixes"
3. Scan "Exit and Save"

Add &13 characters before the EAN 13 barcode data:

1. Scan " Enter Setting"
2. Scan "Set EAN 13 Prefix"
3. Scan ASCII Code table,& set code
3. Scan ASCII Code table,1 set code
3. Scan ASCII Code table,3 set code
4. Scan "Exit and Save"

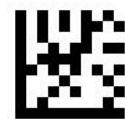

Remove the EAN 13 prefix:

1. Scan " Enter Setting"
2. Scan "Set EAN 13 Prefix"
3. Scan "Exit and Save"

Suffix

Add output characters after barcode data, up to 4 characters can be set

After add a character to all barcode data:

1. Scan " Enter Setting"
2. Scan "Set All Code Suffixes"
3. Scan ASCII Code table,a set code
4. Scan "Exit and Save"

Remove suffix:

1. Scan " Enter Setting"
2. Scan "Turn off all code suffixes"
3. Scan "Exit and Save"

Add &13 characters after EAN 13 barcode data:

1. Scan " Enter Setting"
2. Scan "Set EAN 13 Suffix"
3. Scan ASCII Code table,& set code
3. Scan ASCII Code table,1 set code
3. Scan ASCII Code table,3set code
4. Scan "Exit and Save"

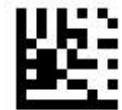

Remove the EAN 13 suffix:

1. Scan " Enter Setting"
2. Scan "Turn off EAN 13 Suffix"
3. Scan "Exit and Save"
